

# Introducing The Adventure Matrix

- Customizable to any footprint. No cookie cutter design here!
- Great for outdoor or indoor courses
- Can be expanded for different shapes and sizes (almost unlimited sizes)
- Made from aluminum and high tensile strength steel foundations and stainless steel connectors
- Can withstand hurricane wind speeds up to and including CAT 5
- Structural integrity allows for minimal angle bracing, guy wires, and foundation leaving more room for adventure activities.
- Can build to heights of 70 ft or more.
- Allows for faster construction turn times
- Compatible with any continuous closed belay system including smart belays
- Cost effective & quick return on investment

**MADE IN THE USA**
